Software Engineer

944201-6203 | anishsony1999@gmail.com | [github](#) | [portfolio](#) | [linkedin](#)

Summary

Full Stack Developer with 1.5+ years of experience building and deploying robust applications using Java Spring Boot and Python Django. Proven expertise in creating RESTful APIs, designing microservices, and developing responsive front-ends with React. Well-versed in the full SDLC, including CI/CD with Docker and Jenkins.

Technical Skills

- **Languages:** Java (8, 11, 17, 21), Python, JavaScript
 - **Frameworks:** Spring Boot, Hibernate, Django, Flask, React.js
 - **Databases:** MySQL, PostgreSQL, AWS DynamoDB
 - **Web & DevOps:** REST APIs, JWT, HTML/CSS, Docker, Jenkins, Nginx, Git
 - **Methodologies:** Microservices, MVC, Object-Oriented Programming (OOP)
-

Professional Experience

Software Engineer | SuffixEsolutions

Aug 2024 - Present

- Develop and maintain scalable backend services for web applications using Java Spring Boot and Hibernate.
- Build full-featured web applications with Python Django, implementing robust user authentication systems.
- Create dynamic and responsive front-end interfaces for enterprise-level applications using React.js.
- Streamline development and deployment by containerizing applications with Docker and establishing CI/CD pipelines with Jenkins.

- Contribute to bi-weekly sprints and collaborative projects within an Agile Scrum environment.

Software Engineering Intern | SuffixEsolutions

Aug 2023 - Jul 2024

- Assisted senior developers in backend development for Spring Boot applications, gaining professional experience.
 - Contributed to front-end component development using React to enhance user interface functionality.
 - Utilized Git for version control and collaborative software development.
-

Projects

Hospital Management System

- Developed a full-stack hospital management system for patient registration, doctor browsing, and appointment booking.
- Led both back-end (Spring Boot, REST APIs) and front-end (React) development, including database schema design.
- **Technologies:** Java, Spring Boot, React.js, Hibernate, REST APIs

Travel Recommendation Engine | [Source Code](#)

- Built a comprehensive tourist site backend in Java/Spring Boot with a Python-based recommendation engine.
- The system provides users with personalized recommendations for attractions and hotels based on their destination choice.
- **Technologies:** Java, Python, Spring Boot, Hibernate
